The Study of Human Rights

What are human rights? When and where did the idea of human rights emerge and how has it become globalized across many different societies and cultures? How and why have human rights been violated, both in the United States and abroad?

How have people struggled to claim and defend their human rights against tyrannical governments, exploitative multinational corporations, and oppressive religious authorities and with what success?

How do human rights protect your political freedoms and allow you to challenge economic, social, and cultural exclusion, and how can these protections be enhanced and made more effective?

These are the types of questions pursued in the interdisciplinary Human Rights Major.

In this major, students receive interdisciplinary instruction in theoretical, comparative, and historical perspectives on human rights through classroom courses and gain valuable practical experience in the human rights field through a supervised internship or senior thesis.
